

KATALIN GULYÁS

Backend-Focused .NET Developer — C# · Blazor · Entity Framework Core

Barcelona, Spain | +36 20 269 6009 | gulyaskata99@gmail.com | katalingulyas.com | linkedin.com/in/katalin-gulyas | github.com/lizzie992 | EN / ES / HU / DE

PROFESSIONAL SUMMARY

Backend-focused .NET developer with hands-on experience designing and shipping production-ready applications, including a solo-built full-stack platform in active use. Brings a decade of experience in international, multicultural corporate environments — leading automation and integration projects, managing stakeholder relationships, and translating business needs into working systems. Combines that operational maturity with a fast-growing technical skill set in C#, .NET, and modern web development.

TECHNICAL SKILLS

Backend: C#, .NET 9/10, ASP.NET Core, Entity Framework Core

Frontend: Blazor, HTML, CSS, JavaScript (learning React)

Database: MySQL

DevOps & Tools: Git, Docker, Linux, REST APIs

Concepts: Role-Based Access Control (RBAC), Event-Driven Architecture, Object-Oriented Programming

PROJECTS BUILT

Baxi — Full-Stack Ride-Sharing Platform (solo project) github.com/lizzie992/Baxi

- Independently designed, built, and deployed a **complete production-ready ride-sharing platform** in C# (.NET) and Blazor, currently **in active use by real colleagues**.
- Built a **custom route-matching algorithm** that scores potential rides by geographic overlap and distance rather than requiring exact matches, surfacing genuinely usable ride pairings.
- Implemented **real-time chat** using event-driven architecture, **authentication and role-based access control**, and an admin moderation system for user and content management.
- Integrated the **Google Maps API** for interactive route visualization and geolocation.
- Designed and maintained the **MySQL database using Entity Framework Core**, and built automated email notifications with multi-language support.
- Managed full deployment via **Docker on a Linux server** — owning the project end to end, from architecture through to production.

RocketVideo — Educational Video Platform (team project)

- Contributing to a team-built video and course-hosting platform at AeonBytes.
- Wrote **core CRUD logic** for courses, modules, and lectures with role-based access control governing content management permissions.
- Designed the **drip-scheduling system** controlling content release timing, anchored to individual student enrollment dates.
- Collaborating within a fixed development team using **Git branching workflows**, resolving merge conflicts and adapting to established team conventions.

PROFESSIONAL EXPERIENCE

Shipping Coordinator / Production Planning Support — Givaudan Deutschland *Apr 2022 – Present*

Baierbrunn, Germany

- Plan and coordinate **20–30+ daily European shipments** across Road, Air, Sea, and Express modes.
- Led the **automation of shipment planning processes**, moving the majority of European shipments to fully automatic planning and directly reducing manual bottlenecks.
- Act as the operational point of contact between production, customer care, and international carrier partners, translating business and customer needs into working processes.
- Manage export compliance and customs documentation (ATR, Certificates of Origin) across EU and global markets.
- Provide backup coverage for Production Planning, balancing capacity, customer priorities, and material availability in SAP.

Road Hub Transportation Execution Coordinator — Givaudan Business Solutions *May 2021 – Apr 2022*

Budapest, Hungary

- Served as the central coordination point for carrier performance and site integration across the European transportation network.
- Led the **integration of two new production sites** into daily operations, managing knowledge transfer and stakeholder training through go-live.
- Owned carrier relationships through monthly KPI reviews, implementing targeted improvements that measurably raised performance.
- Investigated and resolved quality complaints and damage cases, embedding corrective actions into ongoing process improvements.

Key Account Operator — Waberer's International Nyrt. *Apr 2016 – May 2021*

Budapest, Hungary

- Managed strategic customer relationships and daily transport operations for key accounts.
- Elevated account performance to **Category A status** through proactive communication and consistent problem resolution.
- Resolved delays, damages, and invoice discrepancies across the carrier network, maintaining constant communication with clients and internal teams.

Freight Forwarder — Czikoba s.r.o. *Sep 2015 – Feb 2016*

Budapest, Hungary

- Bought and sold road transport capacity for domestic and international shipments as a road transport broker.
- Sourced carriers via TIMOCOM and a network of logistics partners, and negotiated freight rates with carriers and customers.
- Managed end-to-end shipment execution, building a foundational understanding of the freight market from the brokerage side.

EDUCATION & CERTIFICATIONS

Software Engineering Training — Rakete Mentoring, Munich | 2026

One-to-one training in full-stack development, system architecture, and production-level application building.

B.A. Communication & Media, International Communication — Károli Gáspár University, Budapest | 2015

LANGUAGES

Hungarian – Native | English – Fluent | German – Intermediate (B1–B2) | Spanish – A2, actively studying
